

CUSTOM INTEGRATED SPITWATER WASH BAY SYSTEM FOR WESTERN AUSTRALIAN WASTE COMPANY.

CASE STUDY

PROBLEM FACED

The client was looking for an off the shelf solution for a truck wash bay for their fleet of waste removal vehicles. The system was required to include an adequate pressure cleaner and chemical distribution point for their project specifications. Nothing was currently available on the market for quick installation.

EQUIPMENT

SPITWATER HP21200E GT

3000 PSI | 200 BAR | 21L/min

PARTS & ACCESSORIES

1x Complete gun and lance assembly with roll over foamer

1x Hose/Reel with 50m of Hose

1x 10" External Water Filter System

1x 3 Phase Timing Device Kit

1x 3-way Chemical Ball Valve

1x Emergency Stop Control Box

SOLUTION OFFERED

Our team provided a tailor-made solution that was purpose-built for their industrial facility located in Perth, Western Australia. OEM Group fitted a wall mounted SPITWATER HP21200E GT to the wash bay with a 3-way water, degreaser and truck wash chemical distribution system. The system was connected with custom fabricated stainless steel piping that was curved and bent into shape around the wash bay walls. It was also fitted with an emergency stop function should it be required to improve workplace safety around the wash bay operations.

BENEFITS

- ✓ Centralised control device system connected to emergency stop, water, degreaser and truck wash.
- ✓ Extra wash bay room during operations with external machine mounting.
- ✓ Full wash bay coverage with 50 metre hose connected to gun and lance.
- ✓ Singular hose/reel with gun and lance setup to save on consumables.
