WHO WE ARE

For more than 40 years, OEM Group has been the exclusive distributors for a wide range of prefabricated products and innovative industrial equipment. We work with many companies involved in mining, civil, oil, gas, marine, aviation, transport and industrial sectors. Founded in Perth, Western Australia, OEM Group is proudly West Australian owned and operated so we understand the unique needs of our large state and country.

OEM Group is very proud to be the exclusive WA Distributors for Spitwater and Jetfire, and manufacturers of Steprite, Jackrite and WestChock.

Our innovative products are built to optimise and maximise productivity, and improve safety of all our clients. They all meet and exceed the Australian standards of the highest quality. Each of these high-quality brands have a diverse range of products to suit any job. If you cannot find a suitable product, we can tailor make it for you.

Our team of expert technicians can service and repair all brands of pressure cleaner, space heater or industrial vacuums at our workshop in Perth or onsite, and our mobile units can also come to you.

If you require a tailor-made engineering solution, our team of skilled fabricators can design and build fit-for-purpose, custom designs, and industrial equipment.

OEM Group specialises in aluminium welding and fabrication and can create an innovative design or equipment to suit your every need.

We commit ourselves to creating custom solutions that slash your downtime cost, improve safety, maximise your performance and optimise your productivity to the highest level. If there is a safer and more productive way to do the job, we will find it.

OEM promises to deliver to our clients:

- Reduced downtime costs
- Enhance on-site safety
- Optimise their performance
- Improve Productivity

SAFETY ACCESS PLATFORMS

Train Loadout Platforms

Train Loadout Safety Side Entry Access Platform

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates
- Lockable swivel wheels
- Jockey stand

Construction: Aluminum
Height: 1130mm
WLL: 250kg

Part No: OEM00594

Train Loadout Safety End Access Platform

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates
- Lockable swivel wheels
- Tool tray

Construction: Aluminum
Height: 2000mm
WLL: 250kg

Part No: OEM00189

Train Loadout Safety Access Platform Fixed

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates

Construction: Aluminum
Height: 2800mm
WLL: 250kg

Part No: OEM00194

Made in WA TO AUSTRALIAN STANDARDS

Train Loadout Height Access Platform

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates
- Lockable swivel wheels
- Tool tray

Construction: Aluminum
Height: 3250mm
WLL: 250kg

Part No: OEM00190

Train Loadout Inspection Safety Access Platform

- Anti-slip stairway and work area
- Safety handrails
- Lockable swivel wheels
- Overhang
- Tool tray

Construction: Aluminum
Height: 2000mm
WLL: 250kg

Part No: OEM00350

OEM01547 - Crusher Bowl Assembly Platform

Made in WA TO AUSTRALIAN STANDARDS

SAFETY ACCESS PLATFORMS

Reclaimer Platforms

Reclaimer Side Safety Access Platform

- Anti-slip stairway and work area
- Safety handrails

Construction: Aluminum
Height: 415mm
WLL: 250kg

Part No: OEM00227

Reclaimer Wheel Inspection Platform

- Anti-slip stairway and work area
- Safety handrails
- 4-Point Access

Construction: Aluminum
Height: 710mm
WLL: 250kg

Part No: OEM00157

Reclaimer 2-Tier Safety Access Platform

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates
- Lockable swivel wheels
- Gate

Construction: Aluminum
Height: 4700mm
WLL: 250kg

Part No: OEM00378

Reclaimer Platforms

Reclaimer Bucket Wheel Safety Access Platform

- Anti-slip stairway and work area
- Safety handrails
- Lockable swivel wheels
- Forklift pockets
- Gate
- Jacking stand

Construction: Aluminum
WLL: 250kg

Part No: OEM00554

Reclaimer Bucket Safety Access Platform

- Anti-slip stairway and work area
- Safety handrails
- Lockable swivel wheels
- Overhang
- Gate
- Counterweight

Construction: Aluminum
WLL: 250kg

Part No: OEM00558

Chute Platforms

3 Point Safety Access Platform

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates
- Lockable swivel wheels
- Forklift pockets
- Gate
- Jockey stand
- Counterweight

Construction: Aluminum
Height: 3050mm
WLL: 250kg

Part No: OEM00276

SAFETY ACCESS PLATFORMS

Chute Platforms

Chute Inspection Safety Access Platform

- Anti-slip stairway and work area
- Safety handrails
- Lockable swivel wheels
- Forklift pockets
- Gate

Construction: Aluminum
WLL: 250kg

Part No: OEM00398

Chute Cover Safety Access Platform

- Anti-slip stairway and work area
- Safety handrails
- Gate
- Ladder cage

Construction: Aluminum
WLL: 250kg

Part No: OEM00416

Hydraulic Adjustable Platform

- Anti-slip stairway and work area
- Self-closing gates
- Safety handrails
- Lockable swivel wheels
- Forklift pockets
- Manual over hydraulic

Construction: Aluminum
Forklift Slots: Yes
WLL: Various

Part No: OEM01032

Made in WA TO AUSTRALIAN STANDARDS

DIACON CONVEYOR GUARDING & ANTI SPILLAGE SYSTEMS

Diacon System

Diacon Conveyor Hungry Board

The DIACON hungry Board is an aluminum-reinforced, plastic panel that is used on conveyor belts to contain products, reduce spillage and increase conveyor capacity by up to 30%. From greenfield sites to existing plant upgrades, DIACON is your low cost, corrosion free, lightweight and easy to install alternative.

Diacon Conveyor Guard

The DIACON Conveyor Guard is a plastic mesh, conveyor guarding system which improves safety in the materials handling industry. Complementing the DIACON Hungry Board, this corrosion free and lightweight guard requires no painting, is easily installed and allows for quick guard removal during maintenance operations. This product can be configured to meet individual needs.

Diacon Safety Panel

The DIACON Safety Panel is a plastic mesh guarding system configurable to protect operators and maintenance personnel in factories and process plants. This product can be used for guarding of conveyor nip points, transmission elements, workshop equipment, hazard demarcation areas and can provide general risk reduction around machinery and working at heights.

All DIACON products are designed to meet or exceed the requirements of Australian Standards AS4024.1-2006, AS1755-2000

STEP 1

Bolt mounting bracket to existing troughing roller frame

STEP 2

Attach hungry boards to the bracket with locking wedge

STEP 3

"Hook, Hang and Lock" the safety guard panel to the bracket

Product Benefits

- Lightweight and easy to remove
- 100% corrosion free, no need to paint
- Easily configurable into a variety of shapes
- Mount using drop on "hook and hang" system
- Panel guard can hang on nearby handrail when removed
- Panel weight is marked on guard
- Provides long life UV protection
- Meets Australian standards
- Safe during operations and maintenance periods

Access Platforms

Designs available to suit all Makes & Models

Mining Truck Multi Level Tool Tray Safety Access Platform
MODEL F

- Anti-slip stairway and work area
- Safety handrails
- Overhang
- Gate
- Jacking stand
- Counterweight

Construction: Aluminum
WLL: 250kg

Part No: OEM01372

Mining Truck Tray Safety Access Platform
MODEL G

- Anti-slip stairway and work area
- Safety handrails
- Forklift pockets
- Gate
- Jacking stand

Construction: Aluminum
WLL: 250kg

Part No: OEM01377

Rock Ejector Safety Access Platform

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates
- Forklift pockets
- Overhang

Construction: Aluminum
WLL: 250kg

Part No: OEM00289

Made in WA TO AUSTRALIAN STANDARDS

OEM01372 - Mining Truck Tray Safety Access Platform

CUSTOM FABRICATION

Made in WA TO AUSTRALIAN STANDARDS

MINING TRUCK

Access Platforms

Designs available to suit all Makes & Models

Lift Cylinder Side Access Platform
MODEL A

- Anti-slip stairway and work area
- Safety handrails
- Lockable swivel wheels

Construction: Aluminum
WLL: 250kg

Part No: OEM00943

Lift Cylinder Centre Access Platform
MODEL B

- Anti-slip stairway and work area
- Safety handrails
- Lockable swivel wheels
- Forklift pockets
- Gate
- Boom arm

Construction: Aluminum
WLL: 250kg

Part No: OEM01142

Lift Cylinder Access Platform
MODEL C

- Anti-slip stairway and work area
- Safety handrails
- Forklift pockets
- Overhang

Construction: Aluminum
WLL: 250kg

Part No: OEM01075

Made in WA TO AUSTRALIAN STANDARDS

Lift Cylinder Access Platform
MODEL D

- Anti-slip stairway and work area
- Safety handrails
- Lockable swivel wheels

Construction: Aluminum
Height: 1900mm
WLL: 250kg

Part No: OEM00758

Lift Cylinder Access Platform
MODEL E

- Anti-slip stairway and work area
- Lockable swivel wheels

Construction: Aluminum
Height: 4100mm
WLL: 250kg

Part No: OEM01222

Strut Safety Access Platform
MODEL A

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates
- Lockable swivel wheels
- Tool tray

Construction: Aluminum
Height: 2005mm
WLL: 250kg

Part No: OEM01071

MINING TRUCK

Access Platforms

Designs available to suit all Makes & Models

Dual Radiator Safety Access Platform
MODEL A

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates
- Lockable swivel wheels
- Counterweight
- Tool tray

Construction: Aluminum
Height: 1400mm
WLL: 250kg

Part No: OEM00947

Radiator Safety Access Platform
MODEL B

- Anti-slip stairway

Construction: Aluminum
Forklift Slots: Nil
WLL: 250kg

Part No: OEM00937

Radiator Safety Access With Work Platform
MODEL C

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates
- Lockable swivel wheels

Construction: Aluminum
Height: 1640mm
WLL: 250kg

Part No: OEM00938

Made in WA TO AUSTRALIAN STANDARDS

Radiator Safety Access Platform
MODEL D

- Anti-slip stairway and work area
- Safety handrails
- Forklift pockets
- Gates

Construction: Aluminum
WLL: 250kg

Part No: OEM01011

2 Work Area Radiator Safety Access Platform
MODEL E

- Anti-slip stairway and work area
- Safety handrails
- Lockable swivel wheels
- Forklift pockets
- Gates
- Jacking stand

Construction: Aluminum
WLL: 250kg

Part No: OEM01255

OEM00417 & OEM00421 - Engine Bay Safety Access Platforms

Made in WA TO AUSTRALIAN STANDARDS

MINING TRUCK

Access Platforms

Designs available to suit all Makes & Models

Rear Pin Safety Access Platform
MODEL A

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates
- Lockable swivel wheels
- Overhang

Construction: Aluminum
WLL: 250kg

Part No: OEM00944

Rear Pin Safety Access Platform
MODEL B

- Anti-slip stairway and work area
- Safety handrails
- Self-closing gates
- Lockable swivel wheels
- Overhang

Construction: Aluminum
WLL: 250kg

Part No: OEM00932

Rear Pin Safety Access Platform
MODEL C

- Anti-slip stairway and work area
- Safety handrails
- Overhang

Construction: Aluminum
WLL: 250kg

Part No: OEM01004

RECOVERY TRAILER

Introducing the latest innovation in heavy-vehicle recovery!

SCAN THE QR CODE TO WATCH A VIDEO OF OUR RECOVERY TRAILER IN ACTION

We have revolutionised heavy-vehicle recovery with our latest innovation, the OEM Group Heavy Equipment Recovery Trailer.

The self-contained mobile Recovery Trailer offers a safe and convenient solution for heavy vehicle and equipment recovery.

Custom designed and fabricated at OEM Group's workshop in Western Australia the all-in-one management system is a proven performer in the assisting of mobile heavy-vehicle recovery.

The mobile, heavy-duty unit is built to perfectly suit towing heavy-duty assets and designed to mine specifications for a safe, and speedy recovery of heavy vehicles in any situation.

The trailer is self-contained to store and protect key equipment from the elements and to avoid any potential injury hazards, and features a powerful hydraulic winch, integrated rope, hitch and more.

Made in WA TO AUSTRALIAN STANDARDS

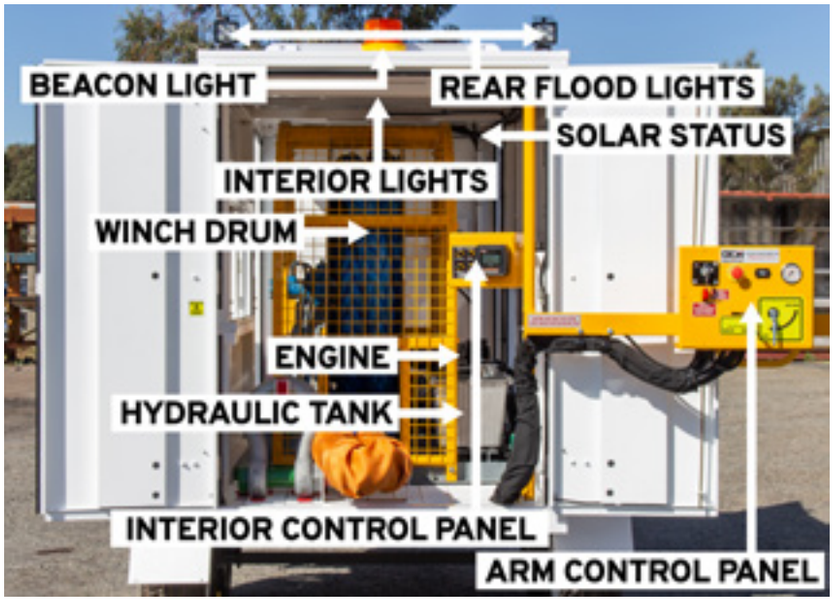
Flexible Solutions

There are two available designs for the OEM Group Heavy Equipment Recovery Trailer.

The standard design is fitted with a single hydraulic winch while the upgraded design is fitted with two hydraulic winces or can be fitted with a Hiab to eliminate all manual lifting, so the potential for operator injury is significantly reduced.

The powerful, fully integrated, hydraulic winch safely and reliably unspools a massive tow rope for attaching to the equipment. The winch is run by a diesel motor and easily respools the rope for next use. Each trailer is fitted with powerful, battery-operated, work lights for 24/7 operation. Solar Panels on the canopy roof then charge these batteries during the day, saving power.

Each feature on the Recovery Trailer has been designed for safe and effective vehicle recovery, saving manpower and time on-site.



Key Features

- Heavy Duty custom design and fabricated by OEM Group
- All-in-one management system for heavy-duty towing assets
- Self-contained unit with an integrated rope, hitch, hydraulic winch and more
- Protects tow ropes from the outside weather conditions
- Self sufficient with solar panels, batteries and work lights for night recovery
- Designed to meet all mine site specifications
- Proven performer

OEM GROUP

YOUR PARTNER IN PRODUCTIVITY

STEPRITE® *Work Platform Ladders*

Introducing STEPRITE® Work Platform Ladders now providing safe and reliable access solutions for working at heights. STEPRITE® design and manufacture a range of quality engineered Work Platform Ladders that comply with all your occupational health and safety requirements.

STEPRITE® Work Platform Ladders are constructed from strong, lightweight structural grade aluminium. This results in a quality product requiring minimal maintenance.

All our STEPRITE® Work Platform Ladders have been designed and independently tested and exceed all relevant Australian Standards.

STEPRITE® Work Platform Ladders can be used for working at heights across a wide range of industries such as Mining Maintenance, Aviation, Construction, Transport, Agricultural, Mechanical and Manufacturing workshops.

SWP2000 (Standard)

SMP1500 (Minespec)

Made in WA TO AUSTRALIAN STANDARDS

Full Range Of Ladders

STEPRITE® Work Platform Ladders come in a range of standard sizes starting at a working height of 500 mm and increase in 250 mm intervals all the way up to our largest at 3 metres.

1. SAFETY CHAIN & CLIPS

All work platforms ladders come with strong fully welded safety chains and clips.

2. SAFETY GATE

All work platform ladders come with an inward opening safety gate, which can be locked in the open or closed position.This provides a kickplate all around the platform as required by Australian standards.

3. C-SECTION

Specifically designed lightweight 'C' section provides high strength and torsional resistance. It also allows all fixings to be concealed and not protrude where they could cause injuries or damage.

4. HANDRAIL

Seamless, fully-welded 915mm high handrail with midrail to ladders and platform.

5. FIXED WHEELS

For easy maneuverability .

6. FRAME DESIGN

Unique design allows the work platform ladders to be flat packed for easy cost-effective transport and storage. Each ladder comes with easy step-by-step installation instructions.

7. ANTI-SLIP

Special non-slip to improve onsite safety by assisting with the preventiion of slips and falls.

8. LIFTING HANDLES

Conveniently placed lifting handles allows the unit to be moved around easily.

9. HEAVY-DUTY PLATFORM

Non-slip surface with 4.5mm thick plate for added strength and durability.

10. TOOL TRAY

Keep tools and equipment dry and clean using the included tool tray.

11. FEET

Large feet with non-slip rubber mouldings to provide a stable footing.

MINESPEC UPGRADE

12. BARN-STYLE SAFETY DOORS

One way self-closing barn style safety doors, with safety hinges and Safety Yellow paint.

13. BOOM-RAIL

Barrier to prevent access up to a controlled point.

14. FORKLIFT POCKETS

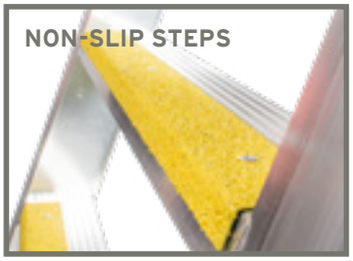
Providing a simple solution for the safe positioning of safety access platforms with a forklift.

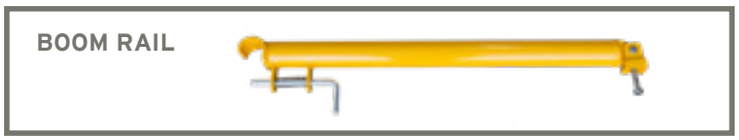
OPTIONAL ACCESSORY

LOCKABLE SWIVEL WHEELS

Steprite Safety Access Platforms are available with optional lockable swivel wheels for ease of manoeuvrability.

Made in WA TO AUSTRALIAN STANDARDS





*Optional Extra

Whilst our standard range of Work Platforms can provide a quick and easy solution to your access needs, we understand that more specialised solutions are often required. STEPRITE® offers a design and manufacture service that will supply a tailor made access solution to suit your specific requirements. STEPRITE® Special Builds can include ladders or access stairs to platforms with fixed or removable handrailing options. Special widths, heights and configurations can be designed along with any access restrictions allowing use in and around or over equipment. A range of wheel style and materials along with extra handling options such as crane lifting points or forklift pockets are also available to assist in moving the ladders to the locations required.

All STEPRITE® Special Builds will be designed and manufactured to comply with relevant Australian Standards and any company specific codes or occupational health and safety requirements. Engineering certification and testing can be provided on request (at additional cost).

We also provide platforms built to mine specifications. These can be customised to suit your individual requirements.

TAILOR-MADE CLEANING SOLUTIONS

Can't find what you want? Contact us at
+61 8 9270 0200 or
contactoem@oemgroup.com.au

With in-house design, engineering and fabrication expertise, we can custom-design a pressure cleaner to perfectly suit your needs.

We are the specialists in creating tailor-made machines, included trailer mounted pressure cleaners (or on skids), complete with access platforms, and on board water tanks.

You can see just a few of the many examples of custom built pressure cleaners below.

If you have a unique application and require a tailor made solution - including extra high pressure - please contact us to discuss a custom-made pressure cleaner.

SHW89/U - Vehicle Mounted Spitwater SW15200PE Hot Water Petrol Pressure Cleaner

SCS54/3 - Cold Water Electric Machine Used in Marine Industry to Clear Pathways for Augur Robot

SHDT067/2 - Hot Water Diesel Pressure Cleaner Trailer Used in Port Quarantine

SCWD067/250 - Skid Mounted Spitwater Cold Water Diesel Pressure Cleaner with 250L Water Supply

TAILOR-MADE ENGINEERING SOLUTIONS

ULTRA HIGH PRESSURE CLEANER TRAINING

At the OEM Group we are working to improve the level of training to optimise the productivity and improve the safety of our clients. We are doing this by partnering with Site Skills Training in the introduction of a new high pressure cleaner training course.

Pressure washers are becoming an increasing part of commercial and industrial operations as the benefits of pressure cleaning become better known.

Conventional cleaning that would normally take a large amount of time energy and sometimes even special access equipment for larger items, can be done easily and simply and even be scrubbed from a distance with a high pressure cleaner in a fraction of the time.

We are proud to be working with Site Skills Australia to achieve greater safety and productivity on site.

Completed at the OEM Group facility, the training is conducted by experienced trainers from Site Skills Australia, one of Australia's leading providers of industry training.

The course has no prerequisites and is conducted over a period of two days. Upon completion students will not only have technical competence with high pressure jetting, but also be better prepared for safe operation within a worksite which may not be familiar. Students will work to achieve four units of competence.

Find out more on our website.

ONSITE 3D SCANNING

OEM Group offers the latest in Onsite 3D scanning services for a non-contact, cost effective and more accurate digitalising of physical objects to reverse engineer custom design engineering solutions for your business - on time and within budget.

Our trained and experienced staff use the **FARO FOCUSS 70 Laser Scanner** to collect all physical measurements from the surface of any physical object or environment. Our scanners are accurate to several millimetres depending on the resolution of the scan to reduce time spent measuring in-field. They are made with a class 1 laser and are safe to look at to reduce risk.

From this collected data, OEM Group can create a high-quality, 3-dimensional digital colour visualisation of the physical object on screen - from large scale rooms, to products, to even mobile equipment.

Our expert in-house drafts team develop 3D modelling of a fit-for-purpose, innovative engineering solution. These can include custom design tools, jacking stands, pressure cleaners, access platforms, and maintenance solutions, suitable for difficult and complex areas for a variety of services and industries.

Our skilled fabrication team will then create the innovative solution to the exact width, height, and weight configurations of the custom design to solve your unique request. Our extensive and innovative skills portfolio also include specialised aluminium welding and fabrication.

OEM Group offer our 3D Scanning services Australia wide and if possible, we will visit your site to analyse the challenge firsthand.

We complete all our design and manufacturing in-house at our Perth location.

ASSET MANAGEMENT

OEM Group's asset management is setup as a one stop shop, to take away all the hassle and work involved in maintaining all safety access and jacking stand equipment. Designed to reduce equipment failure, downtime and improve safety cost efficiency and productivity, OEM Groups Asset management is formed of several key areas.

Accurate Quarterly Auditing

Each quarter, one of OEM Group's qualified inspectors, trained to identify all equipment on site, certify safety and work independently minimising disruptions, visits the site, and conducts rigorous inspections on each piece of equipment. Inspections include, equipment status, availability and quantified and quoted repairs and photos. Individual inspections are uploaded to a secure online portal each day.

Onsite Repairs

OEM Group inspectors are specifically trained to be able to offer onsite maintenance and repairs to damaged platform and jacking stands, preventing costly downtime and problems relating to damaged equipment.

Assets that are deemed unrepairable are isolated and tagged to prevent use. Details are provided in the quarterly report.

Detailed Reporting

Customers are supplied with quarterly reports from OEM Group as part of the Asset Management. These reports highlight asset utilisation, status and the impact and effects over time. These reports can be customised by OEM Group, to meet the clients individual requirements.

Secure Online Portal

Every Inspection along with photos and other information, is uploaded to a secure online portal, giving the customer, accurate clear information on the state and status of equipment. OEM Group updates this portal regularly with each day of inspections and utilises this information to supply the customer with their quarterly reports.

SERVICE & REPAIR

Can't find what you want? Contact us at
+61 8 9270 0200 or
contactoem@oemgroup.com.au

We offer servicing, maintenance agreements and repairs for every brand of pressure cleaners and Jetter. It's not just pressure cleaners either, we offer servicing and repairs for area heaters, and industrial vacuums as well.

Optimising Productivity

Our mission is to improve your on-site productivity. We have specifically designed our servicing and maintenance agreements to service the customer. The intention is to take away the stress, reducing the equipment downtime & prevent costly repairs. No need to book your service, we do that for you - we calculate how often your machine requires servicing and will contact you to schedule routine maintenance to ensure your pressure cleaner is always at its peak performance and giving you a longer lasting pressure cleaner.

Ready & Mobile

Our team of expert technicians can service your pressure cleaners, space heaters or industrial vacuums onsite, at our workshop in Perth or our new location in Karratha.

We also offer mobile services, our technicians come to you, The OEM Group service vehicles carry a huge range of pressure cleaner parts so maintenance can be performed entirely onsite for your convenience, and to reduces your downtime. It saves you time and freight back & forth to the workshop. While your pressure cleaner is being serviced, we can offer you short term hire should you need one from a choice of several pressure cleaners.

WA Wide

Our Perth showroom and workshop are located just 9km out of the Perth CBD.

We are extremely excited with the launch of our new facility in the Pilbara at Karratha.

Additionally, we have several distributors across the state.

All our facilities & distributors are here to assist in servicing and sales of machines and parts.

WE CAN COME TO YOU

SCW70/G - Wall Mounted Electric Spitwater Pressure Cleaner

LONG OR SHORT TERM HIRE

We have a huge range of Spitwater pressure cleaners available for hire at incredibly affordable and flexible rental terms. 80% of our hire fleet is brand new which gives you the latest and greatest technology.

Competitive Prices

OEM Group are your local pressure cleaner experts. We offer competitive pricing on our hire agreements, so you can always be sure you are getting the best price on your machine.

By hiring equipment, you can save on capital and get the gear now. Hire equipment is also fully tax deductible, putting your hard earned money back in your pocket.

As your business grows, you can simply extend or upgrade your plan.

New Machines

80% of our hire fleet are brand new machines, so you will always have the best quality pressure cleaner for the job without the price tag.

We have a huge range of pressure cleaners from cold and hot water, to commercial and industrial and even trailer-mounted machines available to increase your productivity.

Included Service

All our machines are fully serviced and maintenance costs are covered during your hire agreement giving you less downtime.

Our expert technicians will keep your hire machine working at peak performance to increase your productivity.

Huge Range

All our Spitwater pressure cleaners are available for long term hire and a select range are available for short term hire.

If you're not sure what pressure cleaner is right for you, our team of experts can assist you.

Recovery Trailer

Introducing the latest innovation in heavy-vehicle recovery!

SCAN THE QR CODE TO WATCH A VIDEO OF OUR RECOVERY TRAILER IN ACTION

We have revolutionised heavy-vehicle recovery with our latest innovation, the OEM Group Heavy Equipment Recovery Trailer.

The self-contained mobile Recovery Trailer offers a safe and convenient solution for heavy vehicle and equipment recovery.

Custom designed and fabricated at OEM Group's workshop in Western Australia the all-in-one management system is a proven performer in the assisting of mobile heavy-vehicle recovery.

The mobile, heavy-duty unit is built to perfectly suit towing heavy-duty assets and designed to mine specifications for a safe, and speedy recovery of heavy vehicles in any situation.

The trailer is self-contained to store and protect key equipment from the elements and to avoid any potential injury hazards, and features a powerful hydraulic winch, integrated rope, hitch and more.

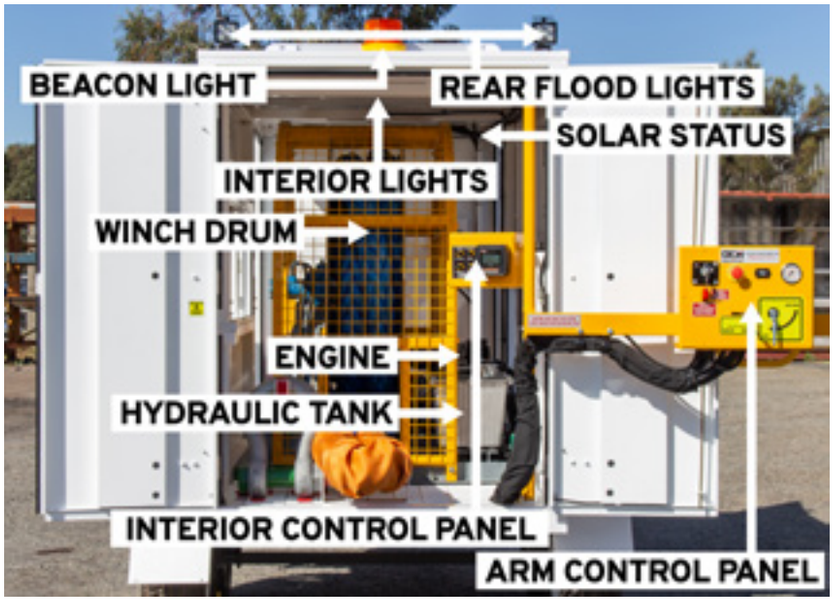
Flexible Solutions

There are two available designs for the OEM Group Heavy Equipment Recovery Trailer.

The standard design is fitted with a single hydraulic winch while the upgraded design is fitted with two hydraulic winces or can be fitted with a Hiab to eliminate all manual lifting, so the potential for operator injury is significantly reduced.

The powerful, fully integrated, hydraulic winch safely and reliably unspools a massive tow rope for attaching to the equipment. The winch is run by a diesel motor and easily respools the rope for next use. Each trailer is fitted with powerful, battery-operated, work lights for 24/7 operation. Solar Panels on the canopy roof then charge these batteries during the day, saving power.

Each feature on the Recovery Trailer has been designed for safe and effective vehicle recovery, saving manpower and time on-site.

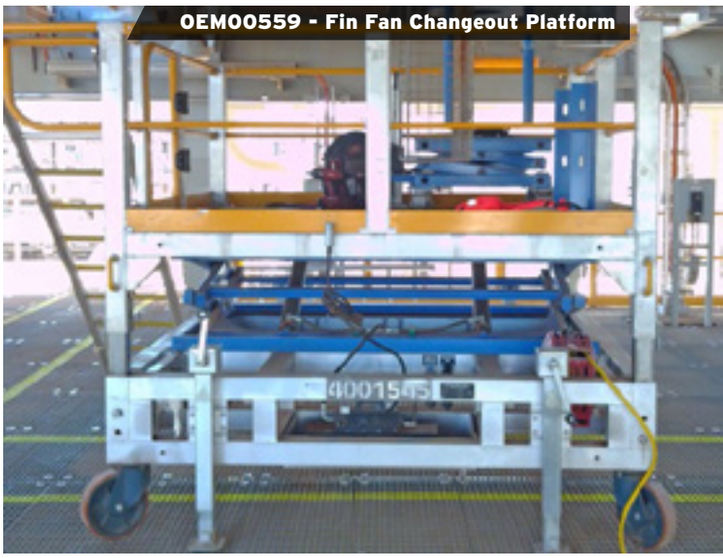


Key Features

- Heavy Duty custom design and fabricated by OEM Group
- All-in-one management system for heavy-duty towing assets
- Self-contained unit with an integrated rope, hitch, hydraulic winch and more
- Protects tow ropes from the outside weather conditions
- Self sufficient with solar panels, batteries and work lights for night recovery
- Designed to meet all mine site specifications
- Proven performer

CUSTOMISED PROJECTS

Specialised FinFan Maintenance Platform



To make money, Oil & Gas needs to be pumping. That's why this major Oil & Gas company asked us to slash their downtime costs.

The Challenge

The maintenance of Fin Fans was the issue – every time this necessary replacement work was done, production stopped and costly scaffolding was erected. To erect and disassemble the scaffolding also added significant time to the job.

The Solution

We designed and built a custom-made platform. The change-over of Fin Fans is now faster, easier, and much safer. The tailor-made platforms - we built 13 of them - are entirely hydraulic and totally compliant with the client's on-plant requirements.

The Benefits

With no need for scaffolding, the operation is much safer and faster – the maintenance workers can position themselves exactly where they need to be. The client is extremely happy; we helped slash days off their operational downtime. Even more, they now own a versatile asset – they've since found a variety of uses for the platform around the site.

CUSTOMISED PROJECTS

Customised Platform For Chute Repairs

OEM00152 - Chute Liner Maintenance Platform

In the resources industry, every minute of shutdown lessens profitable output. So when this large iron ore miner needed to minimize downtime, they turned to the experts – the OEM Group.

The Challenge

On this site, changing the wear liners and checking the condition of the main input chute is a regular necessity. However, it's a tricky job and required maintenance workers to set-up complex scaffolding so they could climb down into the chute. The operation was not only very time consuming, it also compromised safety.

The Solution

After talking to the client - listening closely to understand the design concept they had in mind – and then studying the preliminary drawings they supplied, we designed a tailor-made platform that fits perfectly in the chute. Easily craned into position, it fits snugly and safely, giving workers stable and unimpeded access to the wear liners.

The Benefits

A job that once took days – when the assembly and disassembly of the scaffolding was included – now only takes half a day. The workers are extremely happy that the company looked after their welfare and provided a safe and reliable solution. With less downtime, the whole operation spends more time in full operational capacity.
